

The website encountered an unexpected error. Try again later.

Drupal\sd\Exception\InvalidComponentException: [thickness_last_snowfall] NULL value found, but a string or an object is required. This may be because the property is empty instead of having data present. If possible fix the source data, use the |default() twig filter, or update the schema to allow multiple types.
Drupal\sd\Component\ComponentValidator->validateProps() (line 205 of *core/modules/sdc/src/Component/ComponentValidator.php*).
